DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: species 1 includes claims 3-10, 19-23, and 29-32 and species 2 includes claims 11-18, 24-28, and 33-36. The species are independent or distinct because species 1 is directed to a method of rearranging a first hierarchical menu by replacing a first set of nodes in the first layer with a first replacement non-terminal node **if a first number of terminal nodes exceeds a predetermined threshold limit**, while species 2 is directed to a method of rearranging a first hierarchical menu by replacing a first set of nodes in the first layer with a first replacement non-terminal node **if two or more of the nodes in the initial set are identical**.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-2 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 2626

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
